XVR & RIVR TRAINING WITH VIRTUAL REALITY (VR)

TRAIN TOGETHER IN A CONTROLLABLE ENVIRONMENT

XVR Simulation offers a flexible, highly realistic Virtual Reality (VR) simulation solution to train incident commanders and disaster management teams. With XVR, all levels within Fire Departments and public and private emergency services can be trained in decision-making skills. XVR supports "all hazards" incident simulations.

FEATURES

- Create group virtual reality training scenarios.
- Access over 20 3D training environments in which an unlimited number of scenarios can be created.
- Highly realistic fire and hazardous materials visualization with the ability to realistically visualize spread progression, smoke and fire, as well as chemical emissions response to weather conditions (wind force and direction).
- Library with thousands of 3D objects to create variety of emergency management scenarios.
- Object library containing hundreds of virtual rescue professionals of all emergency services with ground, aerial and water-based transport means. It also features a very large collection of fire & rescue, medical and law enforcement rescue materials.

PHOTOREALISTIC REALISM IN TRAINING SCENARIOS

RiVR Investigate offers unprecedented realistic Fire & Arson Investigation training in Virtual Reality (VR). The photorealistic scenarios in RiVR Investigate offer the user a near-to-life immersive presence in a fire scene. With RiVR Investigate, students can be introduced to a large number of scenarios in a much more realistic way than currently with photos and videos.

FEATURES

- Fire investigation relies on very accurate details. Wrongly positioned evidence can lead to incorrect forensic analysis. As a result, fire investigation training can only be based on real fire scenes or scenes created during controlled burns.
- Each scenario is created from laser-scans and thousands of photographs of real fire scenes created during controlled burns.
- Student wears a VR headset to view the scene by moving his/her head to look around. The user can view any object in the scene in high detail by either moving physically closer to the object or picking up the object with the VR controllers.

FLAIM TRAINER™ IMMERSIVE VR/AR TRAINING SYSTEM

INTRODUCING FLAIM TRAINER™

FLAIM Trainer™ is a firefighter training simulator which provides an immersive virtual reality environment combined with a patented haptics feedback system, breathing apparatus and heated personal protective clothing, to provide a unique training experience not yet replicated.

FLAIM Trainer™ can be easily integrated into a broader training program for firefighters, complementing and extending the current training systems. The base solution is configurable to support customer specific scenarios, and performance monitoring.

EMPOWERING FIREFIGHTERS TO TRAIN MORE, TRAIN BETTER AND TRAIN ANYWHERE, WHILE NOT HARMING THE ENVIRONMENT.

NEXT GENERATION TRAINING SOLUTION FOR FIRST RESPONDERS

Realistic training scenarios arm firefighters with the skills and confidence they need to respond effectively and efficiently during real-life incidents. Live field exercises provide hands-on training, but they are often costly, time consuming and can be hazardous. Training simulation provides an ideal alternative, offering organizations the ability to get more from their current training programs.

TRAINING FOR DIFFICULT OR INFREQUENT CHALLENGES

FLAIM Trainer™ provides firefighters the capacity to train situations and scenarios that are:

- Inherently unsafe and difficult to reproduce.
- No longer possible due to environmental, community and regulatory constraints.
- Incur significant training cost in time, people and assets.

IMMERSIVE VR COMBINED WITH A PATENTED HAPTIC FEEDBACK SYSTEM AND REAL EQUIPMENT PROVIDES A UNIQUE EMERGENCY SERVICES TRAINING EXPERIENCE.

STACK UP THE SAVINGS WITH OUR DARLEY ARMOR AP™ GEAR PACKAGE

STEP UP YOUR GAME WITH THE BEST DUPONT NOMEX®/KEVLAR® OUTER SHELL BLEND

For at least two decades, fire departments choosing outer shells made of 40% DuPont™ Nomex®/60% DuPont™ Kevlar® have been limited to stiff and uncomfortable gear...until now. Utilizing the groundbreaking Filament Twill Technology™ used in PBI Max™, the new Armor AP™ fills the needs of firefighters who prefer improved mobility, durability, and improved protection at an economical price. Armor AP™ - a 6.5 oz. outer shell with absolute performance.

ABSOLUTE PERFORMANCE

How does one achieve absolute performance utilizing the same fibers (meta-aramid, para-aramid) used Fusion™ and TenCate Advance™...and not increase the cost 25-50%? The answer lies in Filament Twill Technology™. Like PBI Max™, Armor AP™ is powered by DuPont™ Kevlar® filament in a twill weave. The result is a lighter weight outer shell (6.5 oz.) with improved comfort/flexibility, improved strength and durability, and equal to improved protection.

IMPROVED DURABILITY

DuPont™ Kevlar® filament allows Armor AP™ to resist tearing for a longer period of time than traditional outer shells like Fusion™ and TenCate Advance™...improving durability.

IMPROVED COMFORT/FLEXIBILITY

Better comfort and flexibility lead to better mobility. Better mobility can make all the difference in a life threatening situation. Firefighters wearing Fusion and TenCate Advance don't need to sacrifice mobility any longer...Armor AP is the answer.

FIREDOME® UST TRADITIONAL HELMET

Comfort and protection is now better than ever. The UST's outer shell is made with Thermoglas® offering a new standard of toughness and durability without sacrificing comfort. Chipping and cracking found in conventional fiberglass helmets is virtually eliminated while still providing chemical resistance and stability at extreme temperatures. The UST features impact liner, high-heat thermoplastic inner shell, Sure-Lock® adjustable headband, replaceable and washable brow pad, Nomex® chin strap with quick-release buckle and postman's slide fastener, Nomex® ear/neck protector, brass eagle, reflective tetrahedrons, and your choice of 4" faceshield or goggles. Meets NFPA 1971. Helmet fronts sold separately. *Ship. wt. 5 lbs.*

THE FIREDOME® LT HELMET

The FireDome® LT structural fire helmet is the result of 20 years of Bullard engineering, polymer technology and expertise. The Bullard Tough LT comes standard with the all-new and innovative, patented Quick-Attach Blade System, that permits the firefighter to simply press on or off either a blade-mounted faceshield or blade-mounted goggles in seconds. This helmet can also be enhanced with a variety of optically correct visors, goggles, and neck protectors to equip your fire department with complete head, face and neck protection to meet your specific applications. With the new compact design and lower center of gravity, the LT keeps weight evenly distributed and holds the helmet stable on the head. Meets NFPA 1971. *Ship. wt. 5 lbs.*

CAIRNS 660C FIBERGLASS HELMET

Helmet shell is reinforced, high-temperature resistant molded fiberglass. Cairns' patented shell release helps reduce the chance of neck injury by allowing the shell to release, leaving the impact cap behind for protection under severe upward impact. Beneath the shell is a high-temperature foam cap for increased thermal and impact protection. Headband features adjustable front for perfect fit between helmet and SCBA mask and 3-position rear ratchet adjustment. Other features include full brim, high-temperature edge trim, faceshield wing protectors, Nomex® chinstrap with quick-release and postman slide, Nomex® neck/ear protector and 4" Tuffshield faceshield. PROTECTIVE HOODS

H41 INTERCEPTOR™ HOOD WITH DUPONT NOMEX® NANO FLEX

The H41 Interceptor™ Hood is made with a layer of DuPont™ Nomex® Nano Flex inside that acts as a filter to reduce firefighters' exposure to persistent fireground carcinogens and other contaminants. We've used this revolutionary material sewn between two layers of knit 6.0 oz. PBI®/Lenzing (20%/80%) to provide the maximum performance for particle barrier filtration, comfort, and thermal and flashover protection.

SCIENTIFIC DATA

The H41 Interceptor™ blocks 95% of particulates at .2 micron in size or larger. For perspective, there are 25,400 microns in one inch and a human hair is about 75-100 microns wide, so a .2 micron particulate is about 500x smaller than a strand of hair. Testing has shown that the particulates sized at less than .2 microns don't have enough mass to make it through the double layer knit and the Nomex® Nano Flex; essentially meaning that this hood blocks 100% of particulates less than .2 microns.

H41 INTERCEPTOR™ HOOD WITH STEDAIR® PREVENT

NEW

Choose the H41 Interceptor™ to reduce the absorption of carcinogens in the highly-permeable skin around your face and neck.

This 2-layer hood features an inner layer of Stedair® PREVENT with one outer layer of 8oz. Nomex® 100%.

- Unmatched breathability compared to moisture barrier technology
- Maintains excellent flame and heat resistance
- Exceeds NFPA 1971 requirements for TPP, THL and burst strength
- Built for durability

INNOTEX GRAY™ PARTICULATE BLOCKING HOOD 25

NEW

Developed to meet the proposed requirements of NFPA 1971, the particulate blocking layer blocks carcinogenic particulates 0.1 µm to 1.0 µm that are found in the combustion of structural fires by greater than 98%. Yet, that same layer also allows for air permeation, which is essential to reduce the risk of increased core temperature.

3 LAYER APPROACH

The INNOTEX GRAY™ Hoods use a 3 layer approach similar to Turnout Gear. The two inner layers are laminated together to increase comfort and reduce bulk.

PARTICULATE BLOCKING LAYER

INNOTEX GRAY™ Hoods use a proprietary version of Stedair® PREVENT, which blocks carcinogenic particulates 0.1 µm to 1.0 µm (microns) by greater than 99%.

AIR PERMEABILITY

The INNOTEX GRAY™ Hoods are air permeable, which means air can pass through them. Body heat can dissipate, helping reduce the risk of increased body temperature.

GORE® PARTICULATE HOOD PROTECTION, COMFORT AND DURABILITY AT AN AFFORDABLE PRICE

As we learn more about the potentially harmful contaminants found at the fireground, the need for protection against those particulate hazards continues to grow. Wearing a particulate hood will give you the additional protection you need.

- Blocks more potentially harmful particulates* than any other hood (99.9%)
- Maintains its 99.9% particulate-blocking performance after 100 wash cycles, exceeds thermal protection requirements
- Comfortable, natural feel
- Inspection opening enables visual inspection of the integrity of barrier layer, and has proven its system level reliability and durability with human FAST** testing on both new hoods and hoods washed 100 times
- Certified to the NFPA 1971 Standard

* Particulates in the 0.1 to 1.0-micron range, per NFPA 1971

FLIR K45, K55 AND K65 THERMAL IMAGING CAMERA KITS WITH FSX™ FLEXIBLE SCENE ENHANCEMENT

FSX™ realtime digital processing results in ultrasharp images defining extraordinary structural attributes, edges, and other instantly recognizable details.

CLEAR AND CRISP THERMAL IMAGES

The maintenance free uncooled microbolometer sensor produces detail rich images at 320 x 240 pixels (K55 & K65) and 240 x 180 pixels (K45). Thermal images are displayed on a large bright 4" LCD for easier navigation and the ability to make more efficient, accurate decisions.

NFPA® COMPLIANT K65 ONLY

The K65 is an advanced, feature rich thermal imaging camera which is fully compliant with the National Fire Protection Association® (NFPA) 1801 2018 Standard for Thermal Imagers covering usability, image quality, and durability for firefighting.

EXPANDED WARRANTY

All new K-Series cameras are protected by our exclusive FLIR 2-5-10 Warranty that includes 2-years of coverage on batteries, 5-years on the camera, and 10-years on the detector.

RUGGED & RELIABLE

The K-Series is designed to meet tough operating conditions. They withstand drops from 2 meters onto a concrete floor, are water resistant (IP67) and fully operational up to +260°C/+500°F for 5 minutes.

EASY-TO-USE; EVEN WITH GLOVES ON

An intuitive and simple user interface allows you to focus on the job at hand. FLIR® K45, K55, and K65 cameras are controlled by 3 large buttons, ideal for a gloved firefighter's hand.

PRODUCE ANALYTICAL REPORTS

Store up to 200 thermal images in the FLIR K-Series on-board archive (K45, K55, and K65) that may later be used to produce analytical reports of what happened at the scene.

IN-CAMERA VIDEO STORAGE (K55 & K65 ONLY)

Not only can the FLIR K55 and K65 save hundreds of still images, they can record and store 200 video files in clips of 5 minutes (maximum) each. K55 and K65 videos are useful for on-site analysis and ideal for training purposes. Videos playback directly from the in-camera archive or download to your computer via USB.

EXTREMELY AFFORDABLE: A THERMAL IMAGING CAMERA FOR EVERY FIRE TRUCK

FLIR's integrated production capabilities allow us to offer the K-series at an extremely affordable price. Increase more of your team's safety within your department's budget.

FLIR K33 & K53 THERMAL CAMERA KITS WITH FSX™

FLEXIBLE SCENE ENHANCEMENT

The K33 and K53 feature FLIR's FSX™ Flexible Scene Enhancement that intensifies structural and textural details in thermal images for better perspective and orientation to help improve situational awareness and give firefighters a greater sense of confidence and safety.

THERMAL IMAGING

STREAMLINED HIGH PERFORMANCE MADE EVEN MORE ECONOMICAL

FLIR offers two affordable, easy-to-use options which do not sacrifice FLIR's renowned clarity, reliability, and performance.

FIREPOWER SIMPLIFIED

Don't need all the bells and whistles... the K33 and K53 are the cameras of choice when you're looking for high image quality with simple, straight-forward operation that is ready for action.

- One glove-friendly on/off button quickly fires up the camera in TI-Basic mode
- An easy trigger pull freezes an image on the K33 or capture stills and video on the K53
- 2-bay charging station makes it a cinch to stay prepared

UNCOMPROMISING RESOLUTION

Both the K33 and K53 offer high-resolution thermal imaging with real-time FSX Flexible Scene Enhancement for intensified detail for greater visibility.

- K33's 240 × 180 thermal imaging matches the resolution of the K45
- K53's 320 × 240 resolution equals the image quality of the K55 and K65
- Bright 4" LCD shows smooth 60Hz thermal image that keeps up with the action

AFFORDABILITY REDEFINED

With the K33 and K53, FLIR offers the firefighting and rescue community the broadest cost-effective range of high performance TICs – part of our mission to help you stretch your budget and put more of these essential tools into the hands of those who could use them most.

FLIR K1

A RUGGED, COMPACT THERMAL CAMERA THAT SERVES AS AN EXTRA SET OF EYES ON THE FIRE SCENE

With a bright, integrated flashlight, the FLIR K1 illuminates the scene to help the user steer and manage the crew more effectively. It also displays 160 x 120 pixel thermal images that help users gain additional situation awareness that is not possible with the naked eye.

FEATURES:

- 160 x 120 pixel IR detector
- MSX® image enhancement for added perspective
- 57° x 44° field of view
- Integrated 300-lumen flashlight
- Drop-resistant to 2m (6 ft)
- IP67 rating
- Pistol-grip design offers line of sight viewing
- Save up to 10k visual and thermal image sets
- Up to 5.5 hours of power from a built-in rechargeable Li-ion battery, charged via USB-C
- **Warranty:** 2-years parts and labor, 10-years for the detector, after camera registration

FLIR K2 TIC WITH MSX®

EXTREMELY AFFORDABLE THERMAL IMAGING CAMERA FOR FIREFIGHTERS

The FLIR K2 is a rugged, reliable, and extremely economical thermal imaging camera specially designed to help outfit more firefighters with the power to see through thick smoke and expedite decisions when seconds count.

MSX® MULTI-SPECTRAL DYNAMIC IMAGING

The K2 uses FLIR's patented MSX technology that embosses key details from the built-in visible camera onto thermal images, providing extra perspective to help you stay oriented and safer while saving others.

COMPACT AND EASY TO USE

FLIR K2's design makes it light and easy to attach to turnouts. A single large button activates the camera even with heavy gloves on. And the brilliant display and intuitive interface help show you the way through dark, smoky conditions immediately, so you can stay focused on the critical job in front of you.

RUGGED & RELIABLE

Engineered to survive tough operating conditions, the K2 withstands a 2-meter drop onto concrete, is water resistant (IP67) and is fully operational up to +500°F (for up to 3 minutes).

MULTIPLE IMAGE MODES

FLIR K2 can be set to one of seven different thermal imaging modes dependent upon the cameras primary use. Switch between modes using FLIR Tools software that you can download free from www.flir.com.

MULTIPLE FIREFIGHTING APPLICATIONS

Fire up the K2 as soon as you arrive on scene for the 360° size-up. Take it inside to see your way through smoke, keep track of others, and determine where to focus fire attack efforts. Find stranded victims faster. And scan for hot spots during overhaul.

A NEW LEVEL OF AFFORDABILITY

The K2's economical price makes powerful thermal imaging more accessible to more firefighters – a small investment that can help pay big dividends when it comes to safety, saving lives, and protecting property.

PROFESSIONAL TOOL IN YOUR POCKET

The FLIR C2 and C3 are the world's first full-featured, pocket-sized thermal cameras designed for wide range of building and electrical/mechanical applications. Keep it with you so you're ready anytime to find hidden hotspots, energy waste, structural defects, plumbing clogs, HVAC issues, and other problems. The FLIR C3 features Wi-Fi to connect to the FLIR Tools app for uploading images, build reports, and send images from the jobsite.

FEATURES:

- **Radiometric:** Fully radiometric images lets you measure any point on the image in post analysis on scenes between -10°C and 150°C
- **Full Radiometric Flexibility for Powerful Reports:** JPEG images store 4,800 individual thermal measurements you can process using the included FLIR Tools software. Analyze, change colors palettes, and access both thermal and visual pictures to create more convincing reports.
- **Touch Screen:** Brilliant 3" intuitive touch screen with auto orientation for easy viewing
- **FLIR Tools:** Includes FLIR Tools professional reporting software for Mac or PC
- **Streaming Video:** Includes Streaming video via FLIR Tools, a feature not usually available on low-cost systems
- **Multi-Spectral Dynamic Imaging (MSX®):** FLIR's patented MSX® technology etches key details from the built-in visible light camera onto the thermal image
- **Sensitivity and FOV to Show More:** The C2's high-sensitivity detector captures the subtle temperature differences and thermal patterns you need to find leaks and building deficiencies. The generous 45° field of view (FOV) frames in more of the scene, the way the pros see it
- **WiFi:** The C3 connects instantly with mobile devices; upload and report critical issues immediately
- **Professional-Level Measurement Features:** Use the C3 Hot Spot or Cold Spot feature to quickly measure within a defined area box. The C3 displays a spotmeter and the Max. or Min. temperature, so you can instantly see where it's hottest or coldest

PROTECT SCBA CYLINDERS WITH QUIC-ACCESS CABINETS

Protect your SCBA cylinders and keep them easily accessible. Cabinets are made of ABS materials with highly-visible safety yellow doors. A bulb seal gasket locks out moisture and dirt, while thermoplastic hinges and latches are highly-resistant to corrosive chemicals and ultraviolet exposure. Each cabinet features two or four windows to allow external inspection of contents and air cylinder pressure readings. Labels are provided to identify SCBA unit mounted inside. Simply mount a Walkaway® bracket (AS070), sold separately, to the inside of the cabinet to secure SCBA. Cabinets can also accommodate protective clothing, emergency equipment, or emergency respirators. *Ship. wt. 21-29 lbs.*

INTRODUCING THE NEW TECGEN51 GEAR

When a call comes in, research indicates that 90% of the time it's not a structure fire. Why wear hot, bulky turnout gear on every call if you don't have to? Dual-certified TECGEN51 is all you need for your calls, including wildland, extrication, MVAs traffic control and incident command - for a third of the cost of traditional turnout gear. Reduce exposing your valuable turnout gear to hazards such as rips, tears, contamination and UV light degradation. Choose TECGEN51. *TECGEN® brand fire resistant garments are UL certified to exceed NFPA 1951 (Technical Rescue) and NFPA 1977 (Wildland Firefighting).*

SAVES EXPENSIVE TURNOUT GEAR

90% of your calls are not structure fire related.

LESS EXPOSURE TO CARCINOGENS

Wearing TECGEN51 on those 90% of calls eliminates potential exposure to hazards such as carcinogens and other harmful particulates that can accumulate on your turnouts.

LESS CARDIOVASCULAR STRESS & FATIGUE

Breathable, lighter weight, single layer garment

TECHNOLOGY

TECGEN® fabrics are made with a high density TECGEN® fiber blend and para-aramid in a comfortable and durable construction. TECGEN® fiber is an inherently flame resistant fiber providing advanced heat and flame protection capabilities. This technology allows us to develop fabrics that offer high levels of thermal protection (TPP) and breathability (THL). You no longer have to sacrifice one for the other.

HEAT STRESS

Whether carrying heavy equipment, dragging hoses or removing car doors, the intense physical activities associated with firefighting can cause firefighters' bodies to generate increased heat. TECGEN51 is ideal for departments looking for gear that offers enhanced comfort, high levels of thermal protection and a solution that is designed to help prevent heat stress.

APPLICATIONS:

- Extrication
- MVA
- Wildland, grass and brush fires
- Trench rescue
- Junior firefighter/explorer programs
- Training
- Search and rescue Confined space
- High/low angle rescue
- Support personnel

LEVEL 3 GEAR HAS ALL THE SAME FEATURES AS LEVEL 1 GEAR PLUS:

- 2" New York Style Reflective Trim
- Detachable name plate with up to 16 reflective letters included
- STEDSHIELD® FR reinforced elbows, knees with padded inserts and cuffs
- Suspender loops or buttons

HOT SHIELD WILDLAND FIREFIGHTER FACE MASK

The Hot Shield Wildland Firefighter Face Mask is a patented highly flame resistant face protector designed by firefighters for use in all wildland firefighting operations. **BK088** offers the extreme protection against burns to the face/neck with the added benefit of blocking and reducing the inhalation of smoke and ash particulate. Multiple layers of patented CarbonX help maintain the crucial airspace firefighters want and human skin needs to survive extreme temperatures. The soft comfortable inside liners (also CarbonX) absorb perspiration, adding to user comfort.

- One size fits all (hook & loop fasteners behind neck)
- Extreme thermal protection (radiant heat or direct flame) of major portions of the face and neck
- Reduction of inhalation of airborne particulate by means of a screening mesh and use of a disposable filter with exhalation valve
- One year materials and workmanship warranty
- Main Users: Firefighters and other workers that are subject to direct flame, radiant heat, smoke and airborne particulate hazards in an outdoor environment and where use of a self-contained breathing apparatus is either impractical or impossible

FORESTRY PUMP & BACKPACK

BK210:

The Scotty pump is a single action pump with a foam eduction attachment and air aspirating nozzle. It eliminates the need to batch mix when Class A foam is required. Each time the pump is charged, 1% of foam concentrate is educted into the pump chamber. The air aspirating nozzle generates foam when the pump is discharged.

BK211:

Single action pump. The pump has a brass pump chamber protected by an engineering-grade polymer sleeve. No tools are required to disassemble the unit. It can be completely disassembled by hand for in-the-field maintenance.

WEATHERHAWK WINDMATE™ WIND METER

HAND-HELD COMPREHENSIVE WEATHER MONITOR

The WeatherHawk Windmate WM hand-held wind meter is a comprehensive weather monitor that measures a full range of environmental data specific to your location. It includes a 48-hr visually displayed bar graph for every function, hour-by-hour. The USA-made fluxgate compass reads when held vertically, gives wind direction in degrees and compass points; and it calculates crosswind, head/tail wind. The compass can be calibrated for variation, declination and deviation. In addition to wind speed and direction, temperature, barometric pressure, altitude, and humidity, the unit includes Wind Chill, Wet Bulb, Dew Point, Delta T and Density Altitude. WM-350 provides an audible storm alarm that alerts you to weather changes, even if the unit is off. The unit includes the AccuWeather Comfort Index and it can be adjusted based on sun intensity to provide a superior human based "feel" for Heat Index. All WindMates are designed with a wind speed accuracy of better than +/- 3% and have a 2-Year warranty.

FIRE ARMOR FIRST RESPONDER VEST

With the new NFPA 3000 recommendations of NIJ Certified Level IIIA Ballistic Protection for Active Shooter/Hostile Event Responses (ASHER), the "First Responder" was developed for Fire & Medical personnel responding to Active Shooter events, Mass Casualty Incidents and dangerous domestic calls.

Developed and designed by Firefighter/Paramedics that work in the industry, who wanted to provide the best Ballistic Protection to our brothers and sisters in a "One Size Fits Most" design, alleviating the need for agencies to have multi-sized vest or making time consuming size adjustments when seconds count.

The system is designed to look like "Bunker Gear", as an external "wear over the shirt or uniform" design, it provides maximum Ballistic Protection in front, back and side coverage, utilizing NIJ 0101.6 Certified Level IIIA soft armor as well as the ability or option of adding 10"x12" NIJ Certified Level III or IV rifle plates to the front and rear. No matter who is sitting in the "seat", the goal is to ensure all responders have a properly fitted vest.

CARRIER SYSTEM:

- Easily adjusts to individual firefighter
- 5 color options designed around Fire/EMS uniforms and equipment
- Carrier System is constructed of 2 parts (1 front panel and 1 rear panel) for universal sizing ranging from 20" up to a 60" waist
- Carrier is constructed of 1000d Cordura™ Nylon material
- Enlarged/integrated front "Bunker Gear" style pocket for Individual First-Aid Kits (IFAK) and/or radio with internal elastic to secure items
- Heavy duty Drag Rescue Device (DRD) handle
- Fully adjustable, closed cell foam-padded shoulders with channels for optional ballistic shoulder inserts
- 360° of 3M™ Hi-Viz reflective tape and 3M™ reflective ID lettering
- Top loading hard armor insert pockets on the front and rear capable of accepting either full size or shooters cut rifle armor

LEGEND OPTIONS

- Fire
- Fire-Rescue
- EMS
- RTP
- Custom legend (11 character limit including spaces)

BALLISTIC PANEL INSERTS:

- 2-piece NIJ 0101.6 Certified ballistic panel inserts also consist of a front and a rear panel, the rear panel is constructed with "wings" to provide maximum "flank" coverage on all sides
- Integrated 10" ballistic cummerbund
- Provides 360° of NIJ Certified Level IIIA Ballistic coverage
- Weight: Approximately 12 lbs.

X-AM® 2500

Dräger's X-am® 2500 accurately detects O₂, CO, NO₂, SO₂ and H₂S and is the only 1-4 gas monitor you need for a wide range of applications. The X-am® 2500 combines reliable sensor technology with long battery life and intuitive operation in an instrument that defines safety.

MATRIX DISPLAY

The X-am® 2500 has a large, easy to read, liquid-crystal display. All gas readings are shown simultaneously and resize automatically depending on the number of sensors installed.

LONG-LASTING, RELIABLE SENSOR TECHNOLOGY

The innovative, catalytic Ex sensor has a high degree of drift stability with a high resistance to silicone and hydrogen sulfide. The sensor boasts an expected service life of more than five years and is extremely sensitive to flammable gases and vapors.

HIGH CAPACITY BATTERY

The Dräger X-am® 2500 can operate for more than 12 hours with either alkaline batteries or with rechargeable NiMH batteries.

ZONE 0 APPROVED

The Dräger X-am® 2500 has Ex approval for zone 0 for user safety in areas subject to explosion hazard. Additionally, it is not sensitive to electromagnetic radiation, e.g. from wireless devices and is water and dust resistant in accordance with protection class IP 67.

HEARTSTART ONSITE DEFIBRILLATOR

THE FIRST DEFIBRILLATOR AVAILABLE WITHOUT A PRESCRIPTION TO COMMERCIAL USERS

SELF-TEST ENSURES READINESS:

- Daily self-tests check electrical components, subsystem, pads and battery
- Self-test also verifies that the pads cartridge is installed and in working order
- Blinking green "Ready" light means the OnSite has passed its last self-test, so you can be confident the defibrillator is ready for use

LONG BATTERY LIFE:

- 5-year shelf life plus 4-year installed life
- Same battery technology used with confidence in millions of cameras

EASY-TO-USE:

- Using the HeartStart Defibrillator is simple. Pulling the green handle activates the defibrillator and voice instructions. These instructions are paced to your actions, to help guide you through the entire process from placing each pad on the patient to delivering a defibrillation shock.

LARGE INTERMEDIATE MODULAR TRAUMA BAG

The new BL886 is a premium mid-sized ALS trauma bag, meaning it will hold virtually all of the medical supplies needed for a trauma call, less the oxygen bottle. The BL886 is heavily reinforced from top to bottom so it will withstand years of abuse. It also features multiple pockets, pouches, loops and compartments – including four removable color-coded zippered pouches for quick access to high priority items. The main hold also includes six removable foam dividers that can be customized along with the colored pouches – or removed completely to suit the users' needs. Multiple points of hi-vis reflective around the bag ensures that it remains visible on-scene.

- Raised PVC/Nylon reinforcement covers bottom and lower half of bag for water and abrasion resistance
- Yellow/silver triple reflective striping surrounds bag and 3M scotchlite stitched into webbing and straps
- Blue and white embroidered star of life logo with silver reflective overlay
- Front and side pockets stretch full-length of bag and feature interior elastic instrument loops and nylon pockets with dividers
- Each colored quick access pouch includes clear vinyl window and interior pocket; green has elastic loops for berman airways
- Main flap is padded and features three clear zippered compartments for access to often-used items without disturbing main-hold supplies
- Shoulder strap is stitched with reflective tape and includes ergonomically shaped shoulder pad; adjustable and removable strap is attached with spring loaded metal US hooks
- Rear of bag has nylon webbing reinforced I.D. pouch with clear vinyl cover
- All pockets and compartments feature double zippers – can be locked for logistical purposes
- Overall Dimensions: 20"L x 16"W x 10"H

ULTRABRIGHT RED-FIRE CLASS II PUBLIC SAFETY VEST

Introducing the Ultrabright Red-Fire Class II Public Safety Vest. This product features a “zip-off” double Velcro® zipper front closure that allows the vest to breakaway from both sides of the zipper, making it the only 6 point breakaway vest on the market. The “performance cut” offers max comfort and allows access to turnout jacket pockets or portable radios at the waistline. The “chevron” reflective pattern on the back offers max visibility and distinct contrast. The shoulder breakaway points have been upgraded with 2” “re-force” Velcro® to ensure that the vest does not fall apart when donned over a turnout jacket but will still break away in emergency situations.

COMBAT READY HOSE

This hose is designed specifically for aggressive interior fire attack operations. The outer jacket is woven from staple polyester yarns over an inner liner consisting of a one-piece extruded through-the-weave tube. Combat Ready is manufactured in a high-visibility white with one red and one blue stripe running the length of the hose. This heat-resistant, drag-resistant, ozone-resistant and kink-resistant hose has superior friction loss characteristics. *Ship. wt. 18-26 lbs.*

- Abrasion-resistant
- High visibility
- 10-year warranty
- Low friction loss

HIGH-RISE HOSE STRAP

Strap consists of 4 quick release color-coded Velcro® brand closures for a range of carry options. U-Shaped design keeps hose center of gravity close to your own for better balance and mobility.

- Carry up to 100 ft. of hose
- 4 heavy-duty nylon straps cinch the hose tight
- Carry over SCBA or shoulder for hands-free movement
- Allows for fast movement in narrow spaces
- Color-Coded Reflective Trim: Silver marks the nozzle
- U-Shaped Design: Keeps hose center of gravity close to your own

LARGE DIAMETER HOSE STRAP

The Large Diameter Hose Strap (LDHS) assists in getting large diameter hose off the hose bed for attachment to a water source safely and allows the engine to proceed for fire operations. Constructed of 3" nylon webbing, with a tensile strength of 22,550 lbs. Strong stitching with heavy brass rivets give you long life. This device allows the firefighter to pull the hose off the rig and place it over a hydrant with additional hose secured with the hook & loop strap, with plenty of spare hose for attachment. Also works great for tanker operations to secure the hose with a heavy hook & loop closure with a zinc-plated adjuster, allowing for additional hose for hydrant operations. Tab allows for operations with heavy firefighting gloves. When used in conjunction with the Oversized Hydrant Tool Kit or the Tool Bag, the firefighter has everything needed to complete efficient and safe hydrant operations. *Color: yellow, length: 60", weight: 32 oz. C. HOSE VICE

CARRY MORE HOSE EASIER

The Hose Vice is the latest in the evolution of our hose carrying systems. This product incorporates many ideas given to us by our customers. Features include: an updated shoulder strap, which is adjustable and removable. The shoulder strap is long enough that a firefighter can carry the bundle across the body for better balance. Two fire-fighters can also carry The Hose Vice. Handles have been incorporated into the ends of the four straps, along with two molded rubber grips on top. The overall length is 35" and each strap has an adjustable circumference range of 20" - 38". Capacity is 150 OR 200' of 1¹/₄" hose as shown. 3M reflective has been added to increase visibility. Made in the USA. *Ship. wt. 3 lbs.*

WRENCHES,

DARLEY HYDRANT STRAP NEVER LOSE YOUR TOOLS

The Hydrant Strap increases the speed and safety of your hydrant hook-ups. The complete Hydrant Strap includes a six-foot loop of heavy-duty nylon webbing fastened to the end of your supply or suction line by a three-foot hose strap. The hose strap is made from seat belt material with a seat belt type buckle. Attached to the hose strap is a tool pouch containing the tools needed for hydrant hook-up. The firefighter stands on the ground and pulls the Hydrant Strap fastened to the end of the supply line in the hose bed and loops the strap over the hydrant. The engine can then lay the hose line. After the hose lay is finished, it is simply unbuckled. *Ship. wt. 1 lb. without tools.*

DARLEY FLOW TEST KIT

ACCURATELY MEASURE FLOW IN HYDRANT SYSTEMS & FIRE PUMPS

Darley offers its own Flow Test Kit with several outstanding design features that make it easier to use than kits offered by others. Precise flow measurement accurately measures flows from 160-1500 gpm within 30-200 psi pitot gauge range. Reliable conversion table-flow results based on standard flow charts and proven with extensive water volume tests. Liquid-filled dial gauge 3 1/2" diameter, Grade A-1% accuracy, 0-200 psi range and vibration free readings. Tester body nozzles and swivel inlet are made of heat-treated aluminum alloy. Parts are hard-coated anodized to provide an extremely durable, protective surface. Automatic coupling design for instant and positive nozzle bore change. Renewable Brass Pitot Blade allows easy, inexpensive pitot blade replacement. Order the complete Darley Flow Test or Economy Kit. *Ship. wt. 18 lbs.*

HYDRANT DIFFUSER

PROTECT PROPERTY AND VEHICLES FROM POSSIBLE WATER FORCE DAMAGE

Created to overcome the constant problem of traffic disruption and water force damage to property and vegetation in the testing area. Discharge stream velocity is slowed and redirected while flowing through a series of steel grids. The pattern diverter, on outer edge of discharge cone, directs diffused stream to side or down, depending on adjustable settings. Slots in the case inlet adapter permit a firm hold of pitot gauge against the full water force before diffusion, assuring a more accurate pitot reading. The pipe-like projection at the right serves as a handle for easy threading during hydrant attachment. Even high pressure hydrants delivering 1125 gpm are now limited to a discharge distance of 5'. Fully in accord with "Special Interest Bulletins" of the American Insurance Association. 2 1/2" NST threads. 17"Hx17"Wx29"L. *Ship. wt. 22 lbs.*

Take pressure readings and determine the amount of water flowing from openings up to 8" in diameter with this Piezometer. Accurately reads flowing pressures to check the fire fighting efficiency of pumpers and hydrants. You may have gauges that give you the static pressure (the pressure when no water is flowing), but without the Piezometer, you cannot determine how much water can actually be delivered through the outlet with out checking the flowing or velocity pressure. Constructed of all brass tube with bleeder valve. Made to Underwriters specifications; Discharge table included. *Ship. wt. 2 lbs.*

DARLEY HYDRANT FLAGS

Darley flags improve fire hydrant's visibility when covered by snow or weeds. Simply remove the 2 1/2" cap, slip on and position the flag in an upright position, then tighten cap. It's that easy. 3/8"x52" steel rod and 3"x5" flag have a powder-coated red finish. *Ship. wt. 3 lbs.*

DARLEY FIRE HYDRANT PRESSURE GAUGE

TEST STATIC PRESSURE

Shows pressure in the main or hydrant. Complete with 2 1/2" gauge, bleed-off valve and chrome-plated brass cap. Easily installed by removing the hydrant cap and screwing on the pressure gauge assembly. Rocker lugs afford an easy grip with a spanner wrench. Gauge instantly shows the static pressure in the hydrant when it is turned on. Dial pressure is 100 psi unless 200 psi is specified. Made only for 2 1/2" NST. *Ship. wt. 5 lbs.*

THE HOSE MONSTER®

THE SAFEST, MOST ACCURATE WAY TO TEST FIRE PUMPS, FLUSH & EVALUATE WATER SUPPLIES THROUGH HYDRANTS

The 2 1/2" Hose Monster™ utilizes a built-in-pitot and is used for hydrant flow testing, hydrant flushing, and fire pump testing. The patented design minimizes damage to landscaping and passing autos by controlling and dramatically reducing the force of flowing water. The 4" and 4 1/2" Hose Monster™ utilizes a precisely machined orifice plate and is used for hydrant flow testing, hydrant flushing, and fire pump testing. *The Hose Monster should be used with a length of hose; attachment directly to the hydrant is not recommended. Ship. wt. AK246: 27 lbs., AK248: 45 lbs.*

- **AK246:** Use for pump testing and hydrant flow testing; includes built-in pitot system
- **AK248:** Use for hydrant flow testing; includes internal orifice plate for flow rate readings

BIGBOY HOSE MONSTER™

The BigBoy Hose Monster™ is used for fire flow testing of hydrants, water main flushing, and fire pump testing from connections 4" or larger. The BigBoy Hose Monster incorporates the patented FM approved Pitotless Nozzle™ so rocks and flushing debris pass through without causing pitot damage and accurately measures water flow-rates from 750 to 2,700 GPM. The BigBoy Hose Monster body is made from Polypropylene and the Pitotless Nozzle is made from precision machined aluminum. *The BigBoy Hose Monster is intended to be used with a hose and should not be attached directly to a hydrant. The unit comes standard with a 4" NH connection and can be flowed from a larger sized connection by use reducing hose or adapters. Your hose choice will depend on: 1) the diameter of the water source connection, 2) the thread or connection type, and 3) the hose length.*

TAKING FLOW READINGS

The BigBoy GPM Gauge is calibrated to read flow-rate directly from the gauge face. No conversion chart is necessary. If you use another pressure gauge instead of the BigBoy GPM Gauge the BigBoy Hose Monster flow chart must be used to convert from psi to GPM. A 0-60 psi gauge is the most suitable range.

FEATURES

- Perfect for Hydrant Flow Testing or Water Main Flushing
- Uses the patented FM Approved Pitotless Nozzle™ so you'll never have to change out a pitot because it got hit by a rock.
- Read your GPM flow-rate directly on the gauge face while flowing
- Weighs only 13 lbs. yet handles high flow hydrants up to 2,700 GPM
- 4" NH standard connection size, other thread specs are available.
- Flow from 4.5", or 5" STORZ connections with additional accessories

INCLUDES:

- Big Boy Hose Monster Body: Made from glass-filled Polypropylene
- Big Boy Pitotless Nozzle 4": Measures 750 to 2,700 GPM; Factory-installed
- Big Boy GPM Gauge: Reads both GPM flow-rate and psi; 4" dial; liquid-filled

FLOW METERS

STANDPIPE FLOWMETER

The standpipe flowmeter is made to hook up to the standpipe in highrise applications ensuring you have adequate flow and pressure at the fire floor. It measures both flow and pressure accurately using an integrated sensor, having a completely self-contained battery powered digital readout. Constructed of anodized aluminum, with a swiveling 45° elbow on the inlet side to reduce kinking. The unit is powered by a 9V rechargeable lithium battery which will power the unit for up to 5 hours. It has a low battery warning which activates when the battery has 90 minutes of life left, as well as a battery check feature.

NEW

- Compact design for high-rise kit applications
- 9V Battery operation with quick change housing
- Dual LED display - Pressure and Flow
- Battery saving Standby operation
- One touch battery meter
- Lightweight aluminum construction

DATATRON PORTABLE FLOW AND PRESSURE RECORDER

AUTOMATED FLOW AND PRESSURE TESTING. SIMPLY PROGRAM TIME AND COUNTS INTO MEMORY.

DataTron is a portable sampling Flow and Pressure Meter for GPM/ LPM (Flow) and kPa/PSI (Pressure) display with all the features you need for serious data gathering in the field. Housed in a shockproof, high-impact case with an attached cover, when the case is closed, the DataTron meets IP 67, and it is watertight, airtight, dustproof, chemical resistant and corrosion-proof.

NEW

- Monitors up to 4 channels individually for flow & pressure
- Memory records & stores data with time & date stamp
- Operates in either manual or automatic mode
- Built-in USB & PC interface for data retrieval in a spreadsheet format
- Records up to 99 events in Automatic mode

INSIGHT PORTABLE FLOW AND PRESSURE METER

Use the new Insight Portable Flow Tester to determine the flow and pressure capabilities of suppression systems or flow test your automatic nozzles, pumpers or hydrants. Test your department's effectiveness, calibrate your automatic nozzles, pumpers or hydrants. All Insight Portable Flow Tester series meters incorporate a new processor that allows for new features including multiple flow point calibration and multiple tube size. The Insight Portable Flow Tester series is an easy-to-use meter which displays gpm directly. Cap the tube for static pressure.

- Flow readout in 4-digit LED display & accurate to within 1% or reading
- Based on the DFA400 series flow meter
- Displays both flow rate and total flow
- Paddle wheel flow sensor
- Hard shell case with handle (10³/₄" Hx9³/₄" Wx7" H)

FLOAT-DOCK® STRAINER PUMP POND WATER FREE OF DEBRIS

The Float-Dock® strainer is a valuable piece of equipment that can save the day in many fire fighting situations. Float-Dock® lets you use the water in ponds or streams, both shallow and deep. Because it operates below scum and debris and above sand and muck, it screens out the materials that wear out impellers, packing and bearings. Since Float-Dock® strainers are self-leveling, there are no whirlpools or suction loss. It will draft in as little as 5" of pond water at pump's rated capacity. In deep water, Float Dock® drafts clean water below the surface. Each unit is fully guaranteed.

PORTABLE COLLAPSIBLE FOL-DA-TANK

THE FIRST AND STILL THE BEST

It was more than 50 years ago that the first Fol-Da-Tank was introduced to firefighters, who recognized its value and quality immediately. Fol-Da-Tank Co. has been continually improving frame and fabric designs to help provide the most reliable portable water tank in the industry. Fol-Da-Tank has proved to be the practical answer as an extra water supply for rural areas, where water pressure is low or as a back-up facility for municipal fire departments. Fol-Da-Tank doubles the fire fighting ability of a tanker truck at an affordable price. Two firefighters can unload from the truck and set up in 30 seconds. While pumper empties the Fol-Da-Tank, a tanker can be supplying more water. With the fire out, Fol-Da-Tank can be emptied quickly with the exclusive 10" diameter drain sleeve, which stores inside or outside of the tank.

ALSO AVAILABLE IN ALUMINUM.

SELF-SUPPORTING FRAMELESS PORTABLE WATER TANK

These self-supporting frameless water tanks have been designed to meet the most stringent requirements of rural/urban fire fighting. Problems with inadequate or unusable supplies of water are eliminated by the use of open top self-supporting portable water tanks. In remote areas, the self-supporting tanks are designed for standby water containment, water shuttling situations and to provide a continuous portable water supply. In remote areas, the SST may be filled by pumping water from a natural water source, such as a stream or creek, with a small gas-operated pump. As the self-supporting tank begins to fill with water, its unique design allows it to become self supporting automatically. The SST can be used as a mixing tank as well as a temporary holding in hazardous waste situations. It may be quickly drained through a threaded flange fitting on the side. The tank is totally collapsible and easily stored in its own compact storage bag. Made of heavy-duty industrial PVC.

- No frame, assembly, foot pump, auxiliary air or need to inflate
- Use as mixing tank, water relay, water storage
- Use for fire fighting, hazardous waste, etc

NEWTON KWIK DUMP VALVE

...BECAUSE EVERY SECOND COUNTS

The Newton Kwik-Dump Water Valve is 29% faster than any other conventional gravity flow valve tested. It can dump 3000 gallons of water per minute, under ideal conditions. As an average, an 1800 gallon tanker can be emptied in less than one minute. All Newton Valves are constructed so that all parts constantly in contact with water are made of stainless steel, brass, or rubber, to give many years of trouble-free service. The remainder of the valve is made of hot-rolled, prime painted mild steel. Can be readily adapted to tanker trucks already in use. Standard 24" valves can be shortened and remote handle configuration is also available for additional costs.

- The standard valve comes with top-mounted controls and handle, and a 3° angle on the flange
- Outlets are 10"x10" square

PRE-CON SUCTION VALVE

This suction inlet valve is designed to operate as an automatic flow control valve eliminating the need for manual adjustments in relation to water flow. During hydrant operation, it automatically opens in proportion to flow demand while the automatic check valve action helps prevent water hammer. During drafting operation, the check valve action holds prime water when flow is stopped, plus allows switching to booster tank and back to draft without flow interruption. Valve can be greased without removal from pumper. *Ship. wt. 20 lbs.*

REVOLUTION INTAKE VALVE

The Revolution has all of the standard features you expect from an intake valve with flows capable up to 2000 gpm (7600 lpm) making it ideal for the most demanding apparatus intake applications.

- Robust, integrated Pyrolite patent-pending handwheel for easy operation
- Critical pump side waterway components constructed of non-corrosive stainless steel
- Durable, powder coated interior and exterior finish
- Field adjustable relief valve between 50-250 psi (requires 7/8" wrench to adjust), includes 1 1/2" NPT female thread
- Built-in Open/Close indicator
- 2000 gpm max flow
- All parts that stay in contact with water are constructed of stainless steel
- Field serviceable design
- 10-year heavy-duty warranty against manufacturing defects and corrosion
- Quick turn Bleeder valve operation - vents into relief discharge
- NFPA 1901 compliant

DARLEY FIRE STORM NOZZLE

DELIVERS QUALITY AND PERFORMANCE

The new Fire Storm nozzle delivers the quality and performance you are looking for in a selectable nozzle with the value you expect from Darley. Choose from fog or straight stream patterns with flows from 30-150 gpm at 100 psi. Design includes spinning turbine teeth, single piece, rubber handle and bumper and aluminum body construction. The nozzle has a 110° fog pattern, full-time swivel inlet, is capable of being flushed without shutting down and a 5-year warranty. Meets all aspects of NFPA 1964. Ship. wt. 5.1 lbs.

- Simple to operate pattern control (1/4" turn from straight stream to fog)
- Great stream performance
- **Flow Rates:** 30-60-95-125-150 gpm @ 100 psi
- Raised lug marks straight stream for limited visibility operations
- **Inlet:** 1 1/2" NH F
- NFPA 1964
- 5-year warranty
- Made in USA

TURBOJET® NOZZLES

The Akron® adjustable gallonage TurboJet® nozzle is unmatched in today's fire service for its flexibility and flow control. The TurboJet® is an adjustable gallonage nozzle, where flow remains the same in all patterns at each GPM (LPM) setting. Use the TurboJet® one time and it is easy to see why it's the "nozzle of choice" by fire fighters worldwide. Colored handles and pistol grip kit included.

- Improved handle for operational flexibility with extra room for the gloved hand and 1 3/4" hose
- Larger, more legible labels
- Easy to service & repair
- Meets new European Standard
- 1 1/2" Mid-Range, Wide Range, High Range and 2 1/2" TurboJets meet Insurance Services Office (ISO) Requirements
- 100 psi (7 bar) Rated Pressure Standard - 75 psi (5 bar) optional with Quality Flow Performance as Low as 50 psi (3.45 bar)
- Simple to operate (1/4 turn from straight stream to fog, raised lug marks straight stream for limited visibility operations)
- Updated, ergonomic pistol grip for great handling
- Durable patent-pending design for easy "snap-on" grips and handle colors to help identify pre-connects and better manage inventory
- Tough, black nozzle body hard coat for expected performance and quality
- Etched smooth bore tips with pressure and flow indicators for easier training and operations
- Enhanced shutoff ball valve alignment when nozzle is open

OPTIONS:

- Wide-ranging selection of nozzle flow and pressure options
- Nozzle handle and pistol grip color
- Bumper color
- Custom etch
- Custom threads and choice of inlet type
- Full range of certifications

CHIEF™ XD NOZZLES

The Chief XD takes the industry standard for handline nozzles to a whole new level. It offers accurate high volume flows at low tip pressures and is built tough like no other nozzle for Xtreme Duty, or XD. The Chief XD is the only handline nozzle that offers a forged shutoff body and forged metal bale handle for maximum strength. It also includes as standard a full round metal ball for the best stream performance, as well as fixed molded urethane or spinning stainless steel metal teeth that don't break. All indicators and markings are laser etched, with no labels to peel off or scratch. Ergonomic grip inserts help with handling and can also be color coded. It's durability and efficiency ensures an embedded level of safety for you and your crew, fire after fire.

- Color coded bumper along with bale handle and pistol grip inserts
- Spinning stainless steel or fixed molded urethane teeth
- Accurate and wide range of flows
- Available with 50, 75, or 100 psi operating pressure

G-FORCE NOZZLES

The G-Force Series of Task Force Tips handline nozzles are designed to provide high performance fire streams in a highly affordable package. Offering your choice of regular or low pressure in fixed, selectable and automatic configurations, the G-Force nozzles integrate an exclusive slide style valve for turbulence free performance even when gated. Other high quality features include an inlet debris screen to prevent stream pattern disruption and easily identified color coded pistol grips and handle covers. Each nozzle incorporates G-Force's unique stainless steel spinning teeth for a wide protective fog pattern, bonded front rubber bumper, reflective labeling, and a standard five year warranty.

- Durable polymer handle developed for the harshest fire ground operations while offering reduced maintenance costs
- Color-coded shut-off handle, grips, and Scotchlite™ labels
- Unique inlet debris screen - unparalleled protection from debris that can affect stream quality
- Flush without shutdown, integrated tactile pattern indicator, and bonded long lasting rubber bumper
- Unique slide valve design - total firefighter flow control and outstanding stream quality, even with the nozzle valve gated and the flow reduced
- Stainless steel spinning teeth for wide fog pattern - tactile indicator provides easy pattern selection
- NFPA #1964 compliant (2008) edition
- Ship. wt. 5 lbs.

VIPER FIRE FIGHTING NOZZLE

The Viper Industrial Heavy-Duty Nozzle with ergonomic rubber-coated pistol grip is an exceptional value for in-plant fire protection or wildland firefighting. It can break apart to help extend hose lines with both the tip and the pistol grip capable of shutting off. The spinning teeth add to the full fog pattern and the protective rubber bumper keeps the tip from sparking. A 95 gpm tip is standard and various tips are available making it the best value in its class.

TRANSFORMER PIERCING NOZZLE SYSTEM

The Transformer Piercing Nozzle is designed to deliver water or foam solutions to areas inaccessible to the firefighter. A series of jets near the point apply a wide reaching pattern at a rated flow of 150 gpm at 100 psi. The easy to use and rugged, twist-grip shutoff valve, regulates nozzle flow without the need for an additional shutoff valve. The 3 port junction block and strike head allow the nozzle to be configured to short, medium, long and L-shaped combinations, making it easily adaptable to specific fire-ground situations. The Transformer Piercing Nozzle features a hardened point, is constructed of hard coated extruded aluminum, and includes a sturdy canvas carrying bag with compartments for each component.

BL670 INCLUDES:

- Twist-grip shutoff valve
- 3 port junction block with striking head
- 2" - 19" extension tubes
- 14" flow tube with piercing point

BL949 (SHOWN) INCLUDES:

- Twist-grip shutoff valve
- 3 port junction block with striking head
- 2" - 19" extension tubes
- 14" flow tube with piercing point
- Distribution nozzle rated at 150 gpm (570 l/min)
- Adapter that allows the distributor nozzle to be used on any 1 1/2" NH threaded hoseline

FEATURES:

- Re-configurable for specific fireground situations
- 150 gpm at 100 psi
- 3 port junction block and twist-grip shutoff valve
- Hardened point
- Canvas carrying bag

900 SERIES PIERCING NOZZLES

These nozzles combine the best of durability, flexibility and are light in weight. They can accommodate extensions for extra reach (2' per extension). They can also be driven in with a mallet if needed. This unique nozzle design needs to be driven in only 3.75" to have full penetration of the sprayer unit. Ideal for walls with coverage of up to 25' in all directions. It's powerful enough for fires in attics, basements, mobile homes, garages, vehicles or any confined space. These piercing nozzles feature a unique safety handle that allows a firefighter to safely hold the unit when a mallet is being used to drive the nozzle in. The handle is removable if needed. They come with 1.5" NST threads as standard; other threads are available. Designed for the rugged demands of the Fire Service worldwide. *Mounting hardware is included. Made in the USA. BLITZFORCE PORTABLE MONITOR

The BlitzForce is Task Force Tips' innovative, lightweight, and highly versatile portable attack monitor. Rated up to 500 gpm with either a combination nozzle or stacked tips, BlitzForce integrates a low loss waterway with positive locking valve control, and a corrosion preventing anodized and powder coat finish. An exclusive high strength tie-down strap and carbide tipped folding legs offer extreme stability in varying fire environments. With an integral stream shaper for superior reach and penetration performance, the BlitzForce delivers a 20° side to side and a 20° to 60° up and down range of stream motion. 5-year warranty and Apparatus Storage bracket are standard.

- Manufactured from lightweight, high strength aluminum alloy and has been hard coat anodized and powder coated for ultimate corrosion protection
- Offers a 20° low attack angle when manned and 30°-60° when unmanned with 20° side-to-side horizontal movement from center
- Features a ball valve with locking pin to prevent unwanted opening and integrated stream shaper
- Includes a 100-500 gpm combination adjustable fog/straight stream nozzle, or Quad Triple Tips, an integrated safety tie down strap, storage bracket, and unique folding legs with carbide tips

EF1 REMOTE CONTROL MONITOR

The EF1 remotely controlled monitor is a great option for wildland and interface apparatus. At less than 13" (319mm) tall, the EF1 is an ideal forestry bumper turret. The EF1 is hard coated aluminum alloy which is then powder coated inside and out. All electronics are tightly contained in a sealed control box that is part of the monitor casting. Monitor wiring is reduced to a minimum and installs easily using a one plug connection.

The EF1 is TFT's most compact monitor but its large, efficient waterway is capable of flows up to 200 gpm (760 l/min).

RAM XD MONITOR

NOW WITH 14° LOWER ATTACK ANGLE

The improved RAM XD features enhancements from the standard RAM monitor specifically designed for eXtreme Duty Use, or XD. The most significant enhancement is a new lower attack angle of 14°. It still features the largest deployed footprint of any portable monitor and only 9 psi friction loss at the rated 500 gpm flow at only 75 psi! The standard hydraulic safety system automatically increases down force under conditions that normally limit stability.

CROSSFIRE® MASTER STREAM APPLIANCE

Crossfire® utilizes the Safe-Tak valve to help ensure firefighter safety. It's a lever-operated butterfly valve connected to a foot on the base of the monitor. In normal operation, the valve is open allowing maximum flow of 1,250 gpm. However, should the monitor start to tip for any reason, the valve closes, cutting the flow area by 90% and reducing the reaction force. By not closing completely, it allows a continued flow, minimizing water hammer. Take a look at all the great features of the Crossfire®. Features include safety plunger, high-visibility gauge, multiple inlets (double 2½" or single 3", 3½", 4", 4½" NST, 4" or 5" Storz), rotational lock lever, quick connect base, stainless steel legs with carbide-tipped spikes, automatic drain and safety strap. **Ship. wt. 50 lbs.**

AQUEOUS FILM FORMING FOAM (AFFF)

Aqueous Film Forming Foam (AFFF) - is a specially formulated synthetic concentrate. A vapor suppressing aqueous film is formed by foam solution draining from the expanded foam blanket. These products are intended for use at proportioning rates of 1%, 3% and 6% on Class B hydrocarbon type fuels such as; crude oils, gasoline, kerosene, diesel fuel and aviation fuels. AFFF's also exhibit excellent wetting characteristics when used on Class A fires. Both aspirating and water fog type nozzles are suitable when using these foams. Either fresh or sea water may be mixed with these foams to achieve excellent results.

ALCOHOL RESISTANT AQUEOUS FILM FORMING FOAM (AR-AFFF)

Alcohol Resistant Aqueous Film Forming Foam (AR-AFFF) - is specially formulated with a physical polymer membrane/barrier between the fuel surface and the foam blanket. They are intended to be used at proportioning ratios of 1% and 3% for hydrocarbon fuels and 3% or 6% for polar fuels such as alcohol, ketone's, methanol and MTBE products. AR-AFFF's may also be used on Class A fires AR-AFFF's suppress the hazardous vapors emitted from these polar and hydrocarbon fuels. Chemguard's AR-AFFF's are suitable for use with foam chambers, standard water fog nozzles, air-aspirating nozzles and foam makers.

CLASS A PLUS FOAM CONCENTRATE

Chemguard Class "A" is a non-corrosive, non-toxic, biodegradable foam concentrate. When mixed with water in the correct proportion, it changes the properties of water. It reduces the surface tension of the water, and produces foam, which allows the water to cling to vertical or horizontal surfaces without run off. This allows the water to absorb more heat and provides greater penetration into Class "A" fuels. *Ship. wt. 45 lbs.*

CLASS A FOAM CONCENTRATE & WETTING AGENT

First Response is a new Class A foam manufactured by the makers of the well known Phos-Chek® brand fire suppression products. It's formulated to make water more effective by the reducing the water's surface tension and, when mixed with air, creates a foam blanket that surrounds fuels with a thick layer of water. Foam reduces the amount of water needed to extinguish the fire reducing water damage and increasing fire fighter safety through quicker knockdown and reduced mop-up/overhaul. *Ship wt. 45 lbs.*

PHOS-CHEK® CLASS A FOAM

Phos-Chek® Class A foam provides superior foam generation and is the most concentrated Class A foam product available today. Phos-Chek® is a unique combination of surfactants that make water more effective for fire fighting. Phos-Chek has been tested and approved for use by the U.S. Forest Service. U.S. Forest Service testing includes product Environmental, Health & Safety, and Corrosion criteria. Phos-Chek® is also a U.L. listed Wetting Agent at a very low use rate of 0.1% for Class A and 0.25% for Class B fires. Phos-Chek® meets the requirements of NFPA 1150, contains no EPA listed hazardous materials, and is readily biodegradable. PRO/pak FOAM SYSTEM

EVERYTHING YOU NEED IN ONE PORTABLE UNIT TO APPLY FOAM QUICKLY

Making great foam is easy with the PRO/pak. Everything you need is contained in one lightweight package that attaches to the end of your 1" fire hose. It can work on pressures as low as 50 psi. With its small size and versatile nozzles you can have foam capability without the expense of built-in systems costing thousands of dollars. Features a high-impact 2½ gallon foam reservoir with built-in eductor that can be set to the ratio of your choice. Large, easy-open fill port has an indicator to show the type of liquid in the tank. The flow is controlled by a twist grip valve/carrying handle. With each quarter turn you select the discharge velocity for inlet pressures between 40 and 500 psi. System comes complete with a straight stream nozzle, low expansion nozzle and medium expansion nozzle. Nozzles can be directly attached to the eductor for one-handed operation, or a short section of hose can be added for maneuverability. *Designed for Class A 3% or 6% AFFF & AR Foams. FOAMPRO® 1600 SERIES PROPORTIONING SYSTEM

No other system delivers foam as easily and accurately as the FoamPro®. All it takes is a flip of the switch to start the system. FoamPro® adjusts automatically to any changes in flow rate or pressures. Plus, the patented, high-tech, electronic controller does all of the work for you. To make the foam wetter or drier simply adjust the dial to change the foam concentrate level. When you use the FoamPro®, you don't have to worry if the foam solution is correct—the system does the proportioning all automatically. Simply set the percentage you want on the control module. Because the precise proportioning is done by measuring flow instead of pressure, you do not have to shut down to add lines, change pressure or refill the foam tank. What's more, the FoamPro® conveniently interfaces with Compressed Air Foam Systems. *Meets NFPA Standards. Ship. wt. 68 lbs.*

EXCLUSIVE FEATURES:

- Automatic proportioning
- Adjustable dial control
- Proportions continuously
- No foam goes through the fire pump
- No in-line restrictions
- Installs in new or existing apparatus
- Delivers 0.1 to 1.7 gpm of concentrate

FAST FOAM 150

CLASS "A" FOAM PROPORTIONING SYSTEM

The Fast Foam 150 system offers a reliable, accurate, compact foam proportioning system at an economical price. This model treats up to 150 gpm @ 1% at pressures up to 175 psi. *Call for pricing at 877-634-6223.*

ENGINE

- 12 VDC, 1/2 hp continuous speed electric motor. The maximum amp draw at full load, 175 psi (12 bar) is 39 amps. The pump is a continuous duty, piston type, positive displacement pump. The pump is rated at 1.5 gpm. Pump is supplied with a 250 psi (17.2 bar) safety relief valve for protection against over pressurization. The Venturi flows up to 150 gpm.

DIMENSIONS

- 21" L x 10" W x 12" H, 75 lbs.

APPLICATIONS

- Mini pumper, pumper, pumper tanker, rescue pumper, wildland/quick attack fire vehicle

FEATURES

- 1.5 gpm/150 gpm, 1/2 hp 12vdc motor, pilot operated relief valve
- Low concentrate float switch
- Venturi 1 1/2" NPT
- Includes installation kit
- Control panel placard with on/off switch and low concentrate light, adjustable foam percentage valve

INSTALLATION OPTIONS

- **Panel Mounted Kit:** Includes all the necessary components needed for a simple install. The control panel will be separate from the pump, allowing you to remote mount parts as needed to fit into tighter spaces.
- **Self-Contained Kit:** Includes all the same parts as the panel mounted kit but will be fully assembled with an aluminum bracket to minimize assembly/installation for the end-user.

PERFORMANCE

- Pumps at 4 to 6 GPM and is capable of 10' of lift

PUMP

- Pump and motor are 12 VDC capable
- Pump utilizes a Nitrile impeller for optimal performance and durability

OPERATION PLACARD / PROTECTION BOX

- Placard is made of 16-gauge stainless steel and mounted with stainless screws
- Overlay is made of Bayfol UV-1 laminate. Offers superior protection against UV exposure and is resistant to scratches and cracking
- Momentary switch and green foam full indicator light included on the placard

PICKUP TUBE

- Clear 3/4" plastic tube with a female camlock fitting to connect to the panel and a stainless pickup tube making it easy to utilize all of the foam in a pail

2 1/2" CAFS PISTOL GRIP NOZZLE

Do you want to pack the most CAFS punch possible in a 2 1/2" hand line? Most 2 1/2" nozzles are nothing more than a 1 3/8" waterway shutoff with a 2 1/2" swivel inlet. Not this nozzle... this pistol grip ball shutoff features a 2 1/2" swivel inlet and a 2 1/2" threaded outlet with a full 2" internal ball opening. This allows more CAFS to be propelled unobstructed through this lightweight pistol grip ball shut-off. We also finish off this Brutus of a shut off with a set of dual stacked tips so you can choose between the 2 1/4" and a 2" tip opening. Easily flows 120 gallons per minute of foam solution and 120 cfm of compressed air at the NFPA recommended 125 psi. *Ship. wt. 7 lbs.*

WHY DEMAND DARLEY PUMPS?

ISO 9001 CERTIFIED

Our pump division is registered as an ISO 9001:2015 Certified facility accredited by Underwriters Laboratories Inc.

ENGINEERED FOR LIFE

Darley engineers use the latest technology platforms such as ANSYS CFD and Solidworks to design our pumps.

SALES AND SERVICE

We strive to ship most Darley parts orders within 24 hours.

SELF-LOCKING DISCHARGE VALVES

Stainless steel ball valves stay secure in the position you choose.

DISCHARGE CHECK VALVE

Prime pumps with discharge gates open and caps removed for rapid water deployment.

AUTOCOOL™ AND MAGNATRANS™

Darley pump transmissions are the strongest in the market. The patented AutoCool™ ensures oil cooling without the possibility of water contamination.

VACUUM CAST IMPELLER

Durable and efficient, balanced to fit a 10-splined stainless steel pump.

MECHANICAL SEAL

Extremely hard and heat dissipative silicon carbide stationary face allows pumps to run dry for short durations maintenance and is drip free.

LONGEST WARRANTY

The longest and most comprehensive warranty in the industry with a six year manufacturer's warranty. Includes three years of parts and labor coverage at no charge on our Midship and PTO pumps. We've got your back.

DARLEY FAMILY OF PUMPS

AUTO CHARGE 11-FOR DUAL BATTERIES

Auto Charge 11 is a fully automatic battery charger for vehicles with dual battery systems. The unit contains two completely independent chargers to sense and control the current to the batteries. Thus parasitic loads on one battery have no effect on the second battery. Total output current is limited to protect the charger but may be supplied to either battery if the adjacent battery does not require it. Normally the current output is proportioned between batteries as required. Comes complete with charging indicator panel. 3-year warranty. 120v input. *Ship. wt. 12 lbs.*

COMPLETE CHARGING SYSTEM AT AN AFFORDABLE PRICE

Auto Charge 2000 is a high-output, dual battery charger that independently charges two batteries. Includes the Auto Charge 2000 automatic battery charger and Auto Eject (20 amp) automatic power line disconnect, providing a complete vehicle charging system that saves you money. Unique electronic sensing circuits sense the true battery voltage while eliminating the need for external sense wires. There is no overcharging and no water boil off. What's more, a built-in battery saver handles the problem of battery loading from rechargeable hand lights, portable radios and other loads. Comes complete with weatherproof, bar graph display that shows the charging condition of each battery; may be remotely mounted. 120v input, 15 amp output. 3-year warranty. *Ship. wt. 17 lbs.*

PUMP PLUS

AIR COMPRESSOR/BATTERY CHARGER PACKAGE

The Pump Plus is a small air compressor and a completely automatic battery charger packaged together. The air compressor is designed to be mounted on vehicles with air brakes to maintain the air pressure in the air brake system while the vehicle is not in use. A pressure switch senses the system pressure and operates the compressor whenever the pressure drops below a predetermined level. Battery charger is completely automatic and is for vehicles with dual battery systems. The batteries are automatically charged and maintain full charge while still being isolated from each other. This unit contains two independent chargers to sense and control the current to the batteries. Designed to mount directly on the vehicle. 12v compressor has 1-yr. warranty; Battery Charger comes with 3-yr. warranty. *Ship. wt. 20 lbs.*

INVIEW 360 CAMERA

The inView 360™ provides the apparatus driver with split screen view. The bird's-eye view is always visible providing a 360° view around the vehicle. This unique view allows the operator to see pedestrians and obstacles in close proximity to the apparatus or vehicle. The second view on the display switches between front/left/right/rear views depending on the operational conditions. The system is networked between the turn signals, and vehicle reverse so the screen automatically switches to left, right, and rear viewing when turning or backing up. An in-cab toggle switch allows the operator to override the default camera view for complete control over the system.

PACKAGE INCLUDES:

- Front camera
- Rear camera
- 2 side cameras
- Controller
- Cable kit
- Toggle switch
- Monitor is available as an option

SUPER AUTO EJECT & AUTO EJECT

Super Auto Eject is a completely sealed automatic power line disconnect. This prevents contamination of the mechanism by road dirt and insures long, reliable life. Comes with a weatherproof cover that is spring loaded to close, preventing water from entering. A solenoid wired to the vehicle's starter is energized when the engine is started. This instantaneously drives the plug from the receptacle. This simple, reliable device eliminates the broken cables which result when drivers forget to remove the shore line when driving away. The Auto Eject comes without sealed housing. All units come with 120v AC connector. Both models are weatherproof. *Ship. wt. 2 lbs.*

LIQUID-FILLED GAUGES

ELIMINATES NEEDLE PULSATION FOR ACCURATE AND EASY READINGS

Crystal-clear Interlube keeps needle fluctuation to a minimum. The SUBZ II freeze-proof isolator keeps gauge working down to -40°F. It's also weather tight so there is no condensation; stops corrosion. Lubricates internal parts, stops wear, maintains accuracy under temperature fluctuations. Zytel (nylon) case with bright stainless steel trim ring has plexiglass lens. 6" gauge has cast aluminum case. Gauges measure 0-600 psi and up to 30" vacuum. *Ship. wt. 5 lbs.*

DARLEY HEAT EXCHANGER

Can be installed in the engine cooling system of any pumper. Instead of going directly into the engine cooling system, mixing with the anti-freeze solution, diluting it and then going out through the radiator overflow pipe, the flow of cool water from the pump bypasses through the condenser coils in the Heat Exchanger. The liquid in the cooling system circulates around the condenser coils and is completely cooled. Prevents loss of anti-freeze solution. Measures 24" long. *Ship. wt. 10 lbs.*

EMERGENCY LIGHTS AND SIRENS

FOCUS LAMPHEAD

VERSATILE LOW PROFILE LAMPHEAD. COMPACT. DURABLE.

DON'T WASTE PRECIOUS LIGHT

The high intensity FOCUS lamphead does not waste precious light. It is designed to focus 100% of the light produced into the area where it is needed. The FOCUS is built tough and has a compact design that allows it to be mounted in places that traditional lighting fixtures do not fit.

BREAKTHROUGH IN SCENE LIGHTING

The FOCUS lamphead was designed to light up the emergency scene evenly, putting 100% of the light on the scene. A high percentage of the light produced by a conventional light fixture is wasted away from the emergency scene and gets dim at a distance. The FOCUS lamphead uses a uniquely designed patented reflector to eliminate wasted light. The curved reflector has over 50 parabolic surfaces that redirect all of the light produced and focus it evenly into the action areas. This allows the FOCUS to put all of the light onto the scene, providing more light close to the vehicle as well as being brighter at a distance.

- AM262: Top mount, top raise pole with FOCUS lamphead
- AM263: Side mount, bottom raise pole with FOCUS lamphead
- AM266: FOCUS lamphead only

DARLEY OFFERS ROBOTICS EQUIPMENT, TRAINING & SUPPORT

Darley is here to help with your departments drone program from the ground up. We understand there is a lot of work and research involved with building a new program and have set up partnerships with industry leaders to provide the latest equipment, support and training.

EQUIPMENT

Working with leading manufacturers, we have solutions to fit all needs and budgets. Equipment listed is a small sample of what we offer. If you are unsure on the different equipment available, please reach out to us to learn about the differences in the different aircrafts.

TRAINING

Get your department's drone program off to the right start with this multiple training options including ground school and flight training. Learn how to navigate the often-complicated FAA COA process and what it takes to start or finish your UAV program. Custom solutions are available either on-site or at one of the dedicated training centers.

TRAINING CLASSES COVER:

- Ground school
- Basic operations
- Advanced operations
- Emergency procedures
- Additional customer requests

SUPPORT AND SOPS

Having a network of departments using and learning these new technologies helps create the framework needed to start your own Standard Operating Procedures without the need to reinvent the wheel. We will assist with outlining your SOPS and continue to support your program beyond just equipment selection.

FAA NEEDS

Want to learn how your department can obtain a Certificate of Authorization from the FAA? Darley is pleased to recommend Skyfire Consulting to help with your department's legal services. These services include, but are not limited to:

- Obtaining Public Declaration letter
- Online COA access application
- Blanket COA preparation and filing
- Jurisdictional COA preparation and filing
- Emergency COA support
- Required FAA documents/COA compliance
- Standard operating procedures
- Emergency response service offerings

MATRICE 200 SERIES

BUILT TO ENDURE. ENGINEERED TO ADAPT.

MATRICE 200 SERIES V2

The new DJI Matrice 200 Series V2 is an all-weather, highly adaptable solution for the First Responder industry. These are available in three different models (Matrice 200, Matrice 210, Matrice 210 RTK) and support a variety of payloads and options. These also feature a suite of intelligent features, up to 38-minute flight time, and the option for top mounted camera.

BUILT TO ENDURE

High-performance motors paired with 17" propellers ensure stable flight in strong winds. The new dual-battery power system automatically heats batteries when flying in sub-zero temperatures, while an enclosed design ensures weather and water resistance, so you can fly in a wide range of environments.

ALWAYS READY

The M200 Series drones fold down in a snap and unfold just as quickly. Gimbal mounting plates and aircraft arms stay mounted during transportation so that you're ready to fly within minutes.

WARTHOG™ VENTILATION BLADE THE LAST ROOF VENTILATION BLADE YOU'LL EVER BUY

The Warthog™ blade easily and quickly cuts through roofing materials, wood flooring and siding. Heavy-duty construction helps prevent tip loss, which is the major problem with standard carbide tipped blades. The tip is mounted to the blade by a special process. This process cushions the tip mounting and makes this blade the most durable, and probably the last, ventilation saw blade you will ever buy. *Ship. wt. 7 lbs.*

- Doesn't bind or clog
- Heavy-duty tips are a full 3/8" wide and 5/8" tall

Blade comes standard with 1" arbor (center) hole.
AS269: 20mm to 1" spacer (Stihl and other saws with 20mm arbors)
AS268: 7/8" to 1" spacer (saws with 7/8" arbors)

VENTMASTER® HEAVY-DUTY FIRE RESCUE SAWS

The VentMaster® Fire Rescue Saws are the TOUGHEST fire rescue chain saws on the market today.

SHOWN WITH BK202

- **VentMaster® COBALT Guide Bar:** Features COBALT alloy inserts at wear points. This alloy is extremely hard with excellent wear, galling, and impact resistance. It will retain these properties at very high operating temps
- **IMPROVED KIS-40 Depth Gauge:** The simplest and most durable depth gauge design. Adjusts cutting depth from 1/4" to 6". Can be removed in seconds without tools for full-length cutting
- **Raptor Carbide Chain:** Features an "open dual raker" design to protect the carbide cutters and control the depth of cut. Will quickly cut through lightweight building materials.
- **IMPROVED Plated Steel Splash Guard:** Strong and durable to protect the saw during extreme cutting operations. Mounted with aviation-style star washers to prevent loosening due to vibration.
- **Other Features:** Professional-grade Husqvarna engine, glove-grip starter handle, ergonomic full-wrap handle, air-injection filtration system, srench tool mounted on handle, one-step choke/start/stop switch

DARLEY RAM JAMMERS

FOR VEHICLE EXTRICATION

When doing a dash roll-up, place the Ram Jammers against the B-posts on each side of the vehicle. Then, instead of only getting one push with the medium hydraulic rams, Ram Jammers give you a secure base to make a second and then a third push for the "Maximum Dash Roll-Up." This will give you a large amount of room in the front of the patient, making it easier to apply spinal immobilization devices. They also absorb the force of the rams to prevent fractures at the B-post. *Ship. wt. 45 lbs.*

HYDRA-RAM HYDRAULIC EMERGENCY ENTRY TOOL

10,000 pounds of force is presented by 138 lbs. of pumping to acquire 1/4" stroke to a maximum thrust opening of 4 inches. The Hydra-Ram can be placed in any position, even upside down, without any effect on its operation; this is a first in hydraulics. Because of its unique size, 13" and only 12 lbs., it can be slung or carried on your belt. The entire unit can be controlled by one user alone, making it truly a one-person operation tool. No hoses, tanks or pumps so there is no maintenance or leaking fluid. Jaws are made of stainless steel with 220,000 psi tensile strength. Special finger grips give a non-slip holding surface. *Ship. wt. 15 lbs.*

INCLUDES:

- A. HYDRA-RAM tool
- B. Cordura® carrying bag
- C. Mallet
- D. Carrying sling

AE097 HYDRA-RAM Hydraulic Emergency Entry Tool \$2,128.95

PERCUSSIVE RESCUE KIT

You'll feel the difference as soon as you hold it. This slam and ram tool exerts a striking force as you've never seen. You'll hear the solid "thud" as the slam bar strikes one of the six assorted tool bits. The ram travels up to 13.6" for maximum impact. Whether you're breaking a brick/block wall or pounding through locks and latches, this tool makes you more efficient. With the slam and ram feature, there is no deflection of pounding force. All of the energy is used to strike effective, penetrating blows by a single person. When hydraulic, electric and pneumatic power is gone or unavailable, you'll still be punching and pounding with this rescue tool.

COMPLETE KIT INCLUDES:

- Percussive tool bar
- Lockbreaker claw
- Metal cutting claw
- Bull point
- Chisel
- Wide chisel
- Carrying bag

SURE CUT SYSTEM

The Sure Cut System will cut virtually any metal, both ferrous and non-ferrous, and is faster than conventional oxy-acetylene cutting. Our system does not require preheating or cleaning the material before cutting. It is easy-to-use and is cost effective for most applications.

FEATURES:

- No Carbon Residue - Clean cuts with no carbon to grind away
- Portable - It can be used in remote areas with the use of a 12v battery
- Faster - Sure Cut is as much as five times faster than oxy-acetylene cutting and up to ten times faster than Carbon Arch Gouging, depending on the thickness of material to be cut
- Easy-to-Use - With Sure Cut equipment, all you need is an ignition source (welder, 12 or 24v battery or torch) and oxygen to operate

ARAMID LIFTING BAGS

Matjack's unique construction of four full layers of aramid fiber provide for a lifting bag unequaled in strength and durability. All Matjack air lifting bags are marked with a distinct white numbered, "bulls eye" for ease of centering under the load, and have a conical, interlocking surface to limit slippage and aid in stacking. All Matjacks have either carry handles or tabs molded right on for lifting or attaching to fixtures. The Matjack "state-of-the-art" deadman controller allows for independent or simultaneous operation of one or more airbags. Supply hoses are color coded to help eliminate confusion during simultaneous operation of more than one airbag. *Made in the USA.*

CMC PMP SWIVEL PULLEY

The Prusik-minding swivel pulley (PMP) is ideal building mechanical advantage in raising systems, high anchor points, or tripod use. The rotating swivel aligns the rope with the direction of the pull. Its stainless steel sheave can be used with either rescue rope or wire cable. By combining the swivel with the pulley, overall system length is minimized, increasing travel. The patented pivoting side plate allows the rope to be quickly inserted. The PMP Swivel Pulley can be used with confidence in work-at-height maneuvers for industrial rope access or technical rope rescue.

FEATURES

- Stainless steel sheave allows use with wire cable or rescue rope
- Prusik-minding side plate opens without having to disconnect the pulley from the anchor
- Double-detent button prevents accidental opening of side plate
- Sealed ball bearings provide maximum efficiency

BN219 CMC PMP Swivel Pulley \$145.95

CMC MPD™

UL CLASSIFIED TO NFPA 1983 – GENERAL USE

The MPD™ allows you to go from lowering to raising without changing hardware. The MPD's high-efficiency pulley, with an integral rope-grab mechanism, allows it to be used as a lowering device on the main line and belay line systems and be quickly changed over to a raising system without switching out or replacing hardware. The combination of essential features into a single device simplifies on-scene rigging, expediting the rescue.

FEATURES:

- Variable-friction descent control device for rescue systems and rappels
- High-efficiency pulley with integral rope-locking mechanism (ratchet) for a haul system
- Built-in bucket allows cleaner rigging and more efficient pulley systems
- MPD allows main line and belay line rigging or can be used as a two-tension system
- One device functions as both a lowering brake and ratcheting pulley for raising
- Converts rapidly to a retrieval line for confined space operations
- Meets BCCTR Rescue Belay Competency Criteria
- Red model accommodates 13 mm rope (11mm blue model also available)

ENFORCER

Enforcer (with/case) is a compact aluminum load cell that measures force up to 20 kN. Utilizing two sampling modes, the Enforcer is able to monitor systems, and log drop testing in high resolution. Unique features like Bluetooth connectivity with the enForcer iOS App and swivel attachment points separate the Enforcer into a class of its own.

FEATURES:

- Lightweight aluminum construction
- Compact and portable design facilitates "in-line" use in rigging systems
- Swivel attachment points diminish potentially dangerous torsional and off-axis forces
- Features two sampling modes: "Slow" for monitoring and "Fast" for drop-testing
- Monitor forces wirelessly on your iPhone with built-in Bluetooth connectivity
- Record and download graphs of events (Enforcer app required, sold separately)
- Measures force in kg, lbf and kN

CMC STEEL LOCKING D CARABINERS UL CLASSIFIED TO NFPA 1983 – GENERAL USE

This proven workhorse of General Use carabiners is available in both Screw-Lock and Auto-Lock gates. On the Screw-Lock models the nut locks against the gate to prevent jamming. Auto-locking carabiners decrease the possibility that the user will forget to lock the gate or that the gate will vibrate unlocked while in use. With the safety of a three-stage auto-locking gate that can be easily opened with one hand, these compact models maximize strength yet allow a gate opening wide enough to fit over most litter rails. Every carabiner is proof loaded.

rockSTEEL AUTO-LOCK CARABINER

The rockSteel offers a surprising strength-to-weight ratio in a carabiner of its capacity. Most steel carabiners are made from 1/2 diameter steel. We use a lighter, 7/16" diameter steel that is heat treated for added strength. The rockSteel frames are CNC machined for precise fittings and exact tolerances. The result is a carabiner with a high strength-to-weight ratio, keylock snag-resistant nose and a feel like no other steel carabiner in the world. The rockSteel carabiner is ANSI Z359.12 (09) and NFPA G compliant. The gate/sleeve is rated at 16kN or 3600 lbs, to protect against inward force against gate.

- Large frame, with large, 1.2" gate opening
- Impressively strong, yet lightweight
- Rated for inward gate force
- ANSI Z359.12 (09) and NFPA G compliant

CMC LEVR™ ESCAPE SYSTEM

UL CLASSIFIED TO NFPA 1983-GENERAL USE

The most compact escape system available. Designed to assure rapid emergency egress with safe, controllable descent. Built around the new CMC LEVR descender, a next-generation device with improved descent control, fast and easy pay-out, and reliable edge transition.

FEATURES:

- LEVR™ design provides smooth and reliable edge transition, minimizing potential for hang-up at window sill
- Engineered for quick, easy horizontal payout of web to allow fast egress from remote anchor points
- Designed to reduce impact force on escape anchor if shock loaded during bailout
- Low-profile side carry bag designed for right or left-handed deployment
- Fire Escape Web T™ is constructed from 100% Technora® fiber for high strength and heat resistance, and dramatically reduces space required for storage
- U.S. Patent Pending

CMC 3D™ LOCKING-BAR DESCENDER

The 3D features two sliding bars for optimum friction control and efficiency. The horn design works well with 13mm rope and smaller, making it easy to add or subtract friction as needed throughout the evolution. The frame dimensions allow for larger rescue-sized carabiners to be used without any contact or friction with the rope. The descender can be loaded or unloaded while connected to your harness for rappelling or to an anchor for one- or two-person rescue lowers. *Ship. wt. 1 lb.*

- Compact, lightweight design
- 3-stage locking center bar for added safety
- Ambidextrous design allows loading from top or bottom or controlling descent from either side of device
- Optimal rack length allows two rescue-sized carabiners to be attached without rope contact or friction from carabiner
- Large horn size allows for easy addition or subtraction of friction, even on larger 13mm lifeline
- 100% aircraft-grade aluminum and stainless steel components
- Patented

PETZL I'D SELF-BRAKING DESCENDERS

It's auto-locking feature combined with a locking position for the handle make the Petzl I'D an excellent descender for working on rope. Additional safety features include an anti-panic function that stops the descent if the handle is pushed too far and an anti-error safety catch that reduces the risk of an accident from the incorrect installation on the rope. Maximum descent distance: 660' (200m). The small model has a safety clip on the swinging side plate that reduces the risk of dropping the device when removed from the rope, such as when passing intermediate anchors. *UL classified to NFPA 198 EN 341 Class A.*

- Unblock the rope and control the descent with the hand on the free end of the rope
- Move more easily on horizontal or low-angle terrain, thanks to the button on the handle
- Get into position without having to tie off the device
- Anti-panic function is engaged if the user pulls too strongly on the handle brakes and stops the descent automatically
- Anti-error safety catch to reduce the risk of an accident due to incorrect installation of the device on the rope. The shape of the cam is designed to improve rope glide when ascending

The ARM-LOC™ also locks on the victim so there is no need for the victim to hold onto the rope. Plus, you will be able to float the ARM-LOC™ on top of the water. It is a safety tool that can be used ANY time you need to get a GRIP on a victim in distress, on land or in the water. ARM-LOC™ has 75' of 3/8" Sterling floatable line.

INCLUDES:

- 1 ARM-LOC™
- 75' of Sterling Floatable Rescue Line
- 1 Omega non locking carabiner
- 1 Throw bag and carrying case
- 3/8" threaded Cadmium plated CO₂ cartridges

HOTSTICK VOLTAGE DETECTOR

HIGH SENSITIVITY DETECTOR FOR EMERGENCY RESPONDERS

The HotStick provides warning of exposed high voltage AC from a safe distance without the need to contact the surface carrying the current. It gives early audible ("beeping") and visual (flashing LED) warnings, and beeps and flashes more rapidly the closer it comes to the voltage. Comes with a built-in self test so there is no doubt about it functioning properly.

- CONFIRM power shutdown, lockout, tag out, disconnects
- FIND hidden sources of dangerous AC from a safe distance
- DETECT power line back feeds from motor generators and energized pools of water
- ENSURE a safe environment for your vehicular rescue
- PROTECT the life of your first responders
- CHECK IT trust is good – checking is better

SKED-EVAC™ TRIPOD

The Sked-Evac™ Tripod extends to ten feet high at the three anchors which are available to clip into. Each of the anchors is anodized red for easy identification, and all are equally well centered to handle a load. The anchors, header, and legs are interconnected with 1/2" stainless steel bolts to provide maximum strength. When at full extension, this tripod allows you to bring the patient in a stretcher completely out of the hole. It is rated to handle an NFPA rescue load. Included with the tripod is a chain which passes through the feet to provide greater strength and stability. The legs are adjustable in 5" increments, and Skedco provides safe working load data for each tripod height on each tripod. Brackets are available for mounting most popular winches. *Ship. wt. 74 lbs.*

DEWALT BATTERY-POWERED BLOWER

Never in firefighter history has one battery fan worked together with your department's other DeWalt battery-operated tools. Introducing the all-new Super Vac 18" variable-speed battery fan, equipped with dual DeWalt FLEXVOLT® batteries, making this rugged yet compact fan the most versatile PPV interfaces on the market. Finally, the industry can turn to a fan with a trusted battery name that pairs with 180+ products, including our fan and Super Vac's dependable history.

- **Curved Handle:** Folds into the frame for compact storage; curved design provides higher grip for better ergonomics.
- **Compact, Roll-Cage Frame:** Features one of the most compact, lightweight designs among battery PPVs with its aluminum frame design.
- **Stream Shaper Guard:** Allows for flexible setback; Air Cone Guard is available by request
- **Polymer Blade:** Minimizes weight; Super Vac's single-piece cast aluminum blade is available by request
- **Optional Shore Power:** 120-240V AC operation is available upon request
- **Standard Flat-Proof Rubber Tires:** Highly maneuverable, and all without lifting the fan; easy to deploy by the smallest firefighters.

ELECTRIC SMOKE EJECTORS

The most popular smoke ejector in the fire service, the Super Vac Electric Smoke Ejector features a patented 4-tip recurved aluminum propeller, which produces a greater intake of air into the vacuum side of the fan, eliminating turbulence at the tips. All Super Vac's are designed to easily accept spiral duct with adapters on the output side for positive ventilation or the input side for negative ventilation.

- **Patented 4-Tip Recurved Aluminum Blade:** Creates a tight spiral of air to eject smoke and fumes away from the building; aluminum holds up better than plastic in high heat
- **Precision-Balanced Blade:** Maximizes output
- **Heavy-Duty Rubber Feet:** Adds friction to keep fan in place
- **4 Carry Handles:** Makes transportation easy with one or two people
- **Front and Rear Guards:** Prevents accidental contact with key components

SPECIAL OPERATIONS BLOWERS

The Tempest Special Operations Power Blower is the latest addition to the positive pressure ventilation and attack arsenal. The fan's unique grille and shroud design create a Laminar Air Flow (LAF) which uses an increased setback (9' to 11') and is highly effective in unique fireground scenarios such as multi-story stairwells, highrise structures, complex structures and commercial structures > 5,000 ft. The SP blower also showcases a number of new features like wheels now located in the back and a wider footprint for increased stability.

SINGLE SPEED ELECTRIC BLOWERS

The most comprehensive line of Electric Powered Blowers for PPV and NPV available today. Built on the same chassis that has been so successful for our Tempest Gasoline Powered Blowers, Electric Powered Blowers are powerful, durable and versatile while maintaining the ability to operate on a standard household current.

- No exhaust emissions, which can collect Carbon Monoxide inside the structure that you are trying to ventilate
- Never requires "oil change" or has gas go bad while sitting in storage
- Designed to start and run off a standard residential 120v 20amp receptacle without tripping the circuit breaker
- Power supply is readily available at most sites

FIRE PROTECTION HALOTRON™ I CLEAN AGENT FOR A, B & C FIRES

Halotron™ I clean fire extinguishing agent discharges as a rapidly evaporating liquid, which is non-conductive, non-corrosive, and leaves behind no residue. Determined to be the most environmentally beneficial halocarbon agent on the market that meets wide performance standards. The primary raw material in the agent is HCFC-123, which has an outstanding profile of near-zero ozone depleting potential (0.0098, CFC-11=1.0) and a low global warming potential (77, 100 yr. CO2 time horizon). *Bracket included. Manufactured and tested to ANSI/UL standards. Complies with NFPA 10 standard. ISO-9001/ ISO-14001 certified. UL listed.*

- 6-year manufacturer's warranty
- Stored pressure design
- Dependable drawn steel cylinders
- Durable high gloss polyester powder paint
- All metal valve construction
- Temperature range -40°F to 120°F
- EPA approved "Clean Agent" for Class A, B and C hazards
- Low GWP (Global Warming Potential)
- Low ODP (Ozone Depletion Potential)
- Short atmospheric lifetime

ABC DRY CHEMICAL EXTINGUISHERS

ABC or Multi-Purpose extinguishers utilize a specially fluidized and siliconized mono ammonium phosphate dry chemical. It chemically insulates Class A fires by melting at approximately 350°F and coats surface to which it is applied. It smothers and breaks the chain reaction of Class B fires and will not conduct electricity back to the operator. *Bracket included. Manufactured and tested to ANSI/UL standards. Complies with NFPA 10 standard. ISO-9001/ ISO-14001 certified. UL listed.*

- 6-year manufacturer's warranty
- Stored pressure design
- Dependable drawn steel cylinders

PURPLE K B:C POTASSIUM BICARBONATE EXTINGUISHERS

Purple K extinguishers contain specially fluidized and siliconized potassium bicarbonate dry chemical which is particularly effective on Class B flammable liquids and pressurized gases. It is electrically non-conductive. Purple K has been the choice of oil, gas, chemical and utilities industries as the preferred fire fighting agent. Bracket included. Manufactured and tested to ANSI/UL standards. *Complies with NFPA 10 standard. ISO-9001/ ISO-14001 certified. UL listed.*

SAFETY CAN CABINETS

CENTRAL STORAGE FOR YOUR FLAMMABLE LIQUIDS

Now you can have on-site storage for your flammables or combustibles. These cabinets offer hands-on easy access with minimal exposure plus provide central storage for your corrosive liquids. They save traveling time, minimize employee exposure and seal off your flammables when temperatures get too high. As high-quality safety storage cabinets, they're designed to meet safety requirements in a variety of applications such as laboratories, production areas, schools, hospitals etc., wherever space for flammable and hazardous liquids is needed and at a premium. For even more space-saving storage try the Undercounter Storage Cabinets. They mount flush with other cabinetry and feature vent openings in back wall. *Ship. wt. 190 lbs.-387 lbs.*

FIRE SAFETY AND SUPPRESSION EQUIPMENT

SINGLE SENSOR GAS DETECTION SYSTEMS

The Xintex Single Sensor Gas Detection Systems are engineered for all vehicles operating on natural gas (LNG or CNG) or propane (LPG).

- Compact, integrated design incorporates the sensor and monitor in a single unit
- Provides early warning of dangerous gas levels in the cab
- Visual alarm at 20% and audible alarm at 50% of the L.E.L.
- Ideal for all CNG / LNG conversions and fleet vehicles
- Yellow "Fault" LED indicates any system issues
- In-line audible horn
- "Test and Reset" membrane touch button
- Fast, simple installation
- Low power consumption

FIREBOY®-XINTEX® CMD5-MB BATTERY POWERED CO ALARM

The Xintex CMD5-MB CO alarm uses a sensor operating with a microprocessor to measure Carbon Monoxide (CO) levels. Using a "TimeWeighted Average" (TWA) process, it monitors CO concentration, temperature and time to calculate levels of Carboxyhemoglobin (COHb). COHb is the degree to which the oxygen carrying capacity of the blood is impeded by the union of carbon monoxide to the hemoglobin and is expressed as a percentage. The human body absorbs CO easier than oxygen and COHb is the ratio of absorbed carbon monoxide to oxygen in the bloodstream. The CMD5-MB alarm calculates this COHb as a function of time and determines the appropriate alarm response.

- Internal battery power - no external power required
- Electrochemical sensor
- Rapid start-up - no "burn-off" period
- More stable sensing
- Reduced false alarms
- Extremely low current draw (<4 mA)
- Modern, low profile design for inconspicuous protection
- Multiple location warning

SELF-TESTING HYDRANT BOOSTER

BOOST HYDRANT PRESSURE IN ANY AREA WITH INADEQUATE WATER PRESSURE

The Darley Self-Testing Hydrant Booster is your solution for consistent, reliable hydrant pressure for rural areas or any area with inadequate water pressure. Have water pressure when you need it, where you need it.

- Production Rate: Up to 300 GPM @ 250 PSI
- Patented self-testing technology
- Mounted on a fully integrated skid unit
- Self-test is a real test based solely on the pump's reaction and performance when a true drop in pressure is created on the discharge line
- Panel contains full web browser capability and its own IP address
- Status of pump running, test mode activation, test successful and system fault light can be monitored from the web and emailed
- Panel is a single point connection design that holds controls for both the primary pump and jockey pump, reducing installation cost
- Jockey Pump is controlled by a variable speed VFD controller that helps further reduce set up time and pump hammering, and prolongs the life of the pumps
- Also includes manual start button
- Automatic operation

CONTINENTAL WASHER-EXTRACTORS

CLEAN GEAR THE RIGHT WAY WITH A CONTINENTAL WASHER

Fire contaminants can expose firefighters to cancer-causing carcinogens and eventually weaken the gear meant to protect them. Blood and body fluids can further expose them to deadly diseases. That's why the NFPA recommends washing soiled turnout gear immediately after exposure to fire or body fluids. The NFPA also warns against cleaning gear in homes or public laundries to avoid cross-contamination. Continental washer-extractors properly clean turnout gear, removing contaminants and biohazards while preserving fabric integrity. They offer a compact design, so machines fit into unconventional locations like truck bays and utility rooms. The programmable control ensures water temperature, extract speed, cleaning chemicals, fill levels and cycle times are perfectly suited to properly clean and decontaminate turnout gear according to manufacturer recommendations. Continental washer-extractors are designed with the future in mind, and are programmable to handle future changes in protective fabrics. So, fire departments can feel secure knowing their investment will handle their laundry needs today and tomorrow.

THE AUTOMATIC FIRE HOSE WASHER

"IT ALL COMES OUT IN THE WASH"

You'll be amazed at how thoroughly, easily and quickly this remarkable cleaner does its job. Ashes, dirt, silt, mud and sludge are all scrubbed and flushed away, restoring hose to its original color. Quiet, chain-drive operation eliminates need for service and repairs. Built to last a lifetime and equipped with long wearing, genuine nylon brushes. Check out all the great features of the Automatic Fire Hose Washer. *Ship. wt. 680 lbs.*

- **Hose is Self-Propelled:** Convenient foot pedal applies pressure on pivoted wringer roll, pulling hose through the washer under its own power
- **Uniform Washing:** Wringers propel hose through washer, ensuring an even, uniform cleaning at a rate of about 30 ft. per minute
- **Cleaning Action:** Hose is soaked in immersion tank filled with lukewarm or cold water. Add detergent as you see fit

ONE-PERSON OPERATION

SHOWN WITH OPTIONAL HOSE LOADING TABLE

- **Drains Hose Linings:** Squeegee action of neoprene wringer rolls eliminates necessity of hanging hose in tower to dry
- **Washes Edges:** Hose embeds itself in the soft-staggered nylon brushes, scrubbing edges as well as flat surfaces

CYCLONE DRYING SYSTEMS

For all firefighters who need fast effective drying of their gloves, boots and turnout gear. Heated air blows through vented drying arms to quickly dry wet gear from the inside out - providing comfort, eliminating mildew and ensuring safety in high heat situations. Boots and gloves are dry in an hour. With drying arm extensions to reach further down the arms of coats or the legs of pants the BK402 can dry 1 set of wet turnout gear in about 2 hours, a fraction of the normal time. Cyclone Dryers can be plugged into an existing 120v wall outlet and once anchored to standard 16" wall stud centers extend less than 14" from the wall. Fit with an efficient, custom motor, these dryers boast very low operating costs and unbelievably low noise levels. A digital 120-minute timer allows you to set the time needed for drying and forget about it.

THE HOSE COILER

ROLL HOSE QUICKER AND EASIER THAN EVER

Designed by a firefighter to make it quicker and easier to coil 1" to 3" double jacket hose in lengths up to 50 feet (single jacket forestry hose in lengths of 100 feet). Simply attach the mounting bracket to the rear of your apparatus, pickup truck or any emergency vehicle waist-high, insert the coiler crank and roll away. The coiler itself is made of two parts which nest together for compact storage. Once the hose is coiled simply remove the tight coil from the inside section and you're done; no more bending over to pick up heavy coils. Use this system anywhere you choose to install the mounting bracket (included). Also available are trailer hitch mounts. Call for pricing. Fits in hitch receiver and Wildland Mounts pound in the ground.

PRICING

Prices listed in this catalog are current as of July 1, 2019. Due to the wide selection of products being offered, prices may change without notice. We also reserve the right to make corrections in the event of a misprint. Please confirm pricing with a Darley® representative at time of order. Volume discounts are available. Darley will match pricing on any lower offer from another supplier.

OPEN ACCOUNT TERMS

Terms of Net 15 Days shall be extended to city and other governmental agencies in good standing. These terms are also granted to businesses rated "good" or "high" and have a rating from CC to 5A by Dun & Bradstreet. Those companies that do not have a D&B rating in this range should contact our Credit Department at 1-630-735-3500 for a complete credit application. We encourage new customers placing their first order to make their initial payment by check or credit card. This will help avoid any shipping delays that may occur during the credit review process.

ORDERS PLACED BY INDIVIDUAL

All individual orders must be accompanied by full payment (cashiers check, money order or credit card) plus shipping charges and applicable state tax. We accept Visa, MasterCard, and American Express.

SALES TAX

We are required by law to add sales tax to goods shipping into the following states: CA, CO, FL, GA, HI, IA, IL, MN, NC, OH, PA, TN, TX, VA, WI, WA. State laws require us to have your signed exempt/resale certificate on file at our offices. We will be forced to charge you sales tax, if we do not have this documentation. All sales to individuals in these listed states are always taxable.

ORDER FORMS / TURNOUT MEASUREMENT GUIDE

Now available online at: www.edarley.com/ordering and www.edarley.com/turnoutmeasuring

DAMAGED GOODS / SHORTAGES

In the event that you receive a damaged or short shipment, you must immediately file a claim with the carrier. Under ICC regulations this claim is the consignee's (your) responsibility. Please contact our Customer Service Department 1-800-4-DARLEY for assistance.

NO HASSLE RETURNS

Please contact our Customer Service Department at 1-800-4-DARLEY. For return instructions. A return authorization number (RMA) will be required.

RESTRICTED SALES ITEMS

Darley® carries a wide range of products intended for sale to public safety professionals. Orders for goods including, but not limited to, badges, personal identification, emblems and nameplates must be placed on department letterhead with official identification.

CHANGE OF ADDRESS / DUPLICATE MAILINGS

It's important for Darley® to keep our mailing lists as current as possible. Please advise us of any change of address or personnel. In the event you've received duplicate mailings, simply scan the back of the catalog and email changes to catalog@edarley.com. As a token of our appreciation, we'll take \$5 off your next purchase.
